Summary

Full-Stack Engineer & AI/ML Developer (B.E. CSE, 2024) with 2+ years of experience building intelligent web applications using TypeScript, React, Node.js, and Python. Proficient in designing responsive UI components with HTML5, CSS3, Tailwind CSS, and Figma, while integrating LLM pipelines, RAG systems, and ML-powered APIs into production-grade platforms. Experienced in leading AI-driven development initiatives and mentoring peers in Agile/Scrum environments.

Technical Skills

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, Responsive UI
UI/UX & Design: Figma, InVision, Adobe Design Software, Wireframing, Component Design, Design-to-Code
AI/ML: LLM Integration, LangChain, RAG Pipelines, NLP (Text Classification, NER), Vector Embeddings, pgvector
Backend & APIs: Node.js, Express.js, Python/Flask, Django REST, GraphQL, RESTful API Design, WebSockets
Databases: PostgreSQL, MySQL, MongoDB, Redis
DevOps & Cloud: Docker, GitHub Actions CI/CD, Microsoft Azure, Git
AI Dev Tools: Claude Code, OpenAI Codex, n8n, Make (agentic workflow automation)

Experience

Full-Stack Developer – AES Technologies India Pvt. Ltd., India *Jan 2026 – Present*

- Led AI-assisted development initiatives using Claude Code and Codex, mentoring engineers and driving adoption of modern ML-powered workflows across the team.
- Designed and shipped pixel-perfect, responsive frontend applications in React/Next.js translating Figma and InVision mockups to production-ready UI with HTML5, CSS3, and Tailwind CSS.
- Built scalable backend APIs (Node.js, Python) with RESTful and GraphQL interfaces achieving sub-200ms response times; integrated AI/ML services into core application workflows.
- Managed CI/CD pipelines on Azure and containerized services with Docker, ensuring reliable, fast deployments across development and production environments.

Software Associate – AI & Full Stack – SNS Square, India *Jul 2024 – Dec 2025*

- Developed responsive, component-driven UIs using React.js, Next.js, and Tailwind CSS aligned with design specs from Figma, improving user engagement by 25%.
- Built RESTful APIs with Python/Flask and integrated NLP pipelines for text classification and named entity recognition, deploying ML models into live production systems.
- Engineered AI-driven automation workflows (n8n, Make) integrating internal APIs and databases, reducing operational costs by 65% through intelligent process optimization.
- Contributed to internal communications and knowledge-sharing in Agile/Scrum sprints, enforcing frontend coding standards and consistency across teams.

Projects

AI Document Intelligence Platform *(Python, Flask, Azure AI, Vector Embeddings, Docker)* 2024

- Built and deployed a REST API integrating Azure AI Document Intelligence with vector semantic search and ML-powered classification, reducing manual review time by 60%.

Real-Time Chat Client & Server *(Node.js, WebSockets, React, Redis, Docker)* 2025

- Designed a full-stack real-time messaging platform with a responsive React UI, WebSocket backend, Redis pub/sub messaging, and Dockerized horizontal scaling.

Full-Stack E-Commerce Platform *(React, TypeScript, Node.js, PostgreSQL, Docker)* 2025

- Built a scalable e-commerce app with a responsive component-driven frontend (Figma to code), JWT authentication, and Dockerized PostgreSQL backend.

Education

B.E., Computer Science – SNS College of Technology, India 2020 – 2024

Certifications

Azure AI Document Intelligence | Model Context Protocol (MCP) & Advanced Topics | Developing AI Apps with Python & Flask | Redis Certified Developer | Nasscom Python Certification
